SUBJECT INDEX

A

ABSORPTION
carbon dioxide, in caustic solution, concurrent flow 168
chemical reaction, theories and relationships 195
cold scrubber, with heat exchange, design 87
equipment, design and performance 103
equipment, design, calculations for hydrocarbons 114
gas, from sheared bubbles 216
hydrogen, by Pd/Pt alloys 119
hydrogen, equilibria in Pd 119
hydrogen, from HCl by Pd/Pt alloy 141
in towers, gas separation 238
packed towers, design, transfer coefficients 263

ABSORPTION COOLING
hermetic transfer device, for circulation 189
technological advances, review 210

ACETYLENE. See also Hydrocarbons
competitive factors, future market 81
derivatives, flow sheet 59
feedstock selection, for pyrolysis 279
Montecatini process, at Diamond Alkali's Texas plant 279
partial combustion, burner design 156
partial combustion process, long-range growth 99
process review 12
pyrolysis burner, two-stage, for hydrocarbons 130
pyrolysis, pilot plant results 107
recovery, selective solvent 59
recovery, solvent extraction of cracked products 35
transmission systems, safe design practices 206

Production
economics, methane pyrolysis 99
pyrolysis of light liquid hydrocarbons 107
pyrolysis of naphtha—natural gas 35

ADSORPTION. See also Carbon Black, Catalysts; Chemisorption
countercurrent unit, continuous, design 195
deposition of molecular beams 216
fixed bed, design, commercial systems 44
gases on carbons, theory 94
gases on Graphon 216
graphitic oxide and water 289
hydrocarbon gases, carbon and silica gel 267
hydrogen, on graphite at elevated temperatures 242
hydrogen, on metal films 141
intermolecular surface reactions 141
isosteric heats 242
krypton, surface area measurement 118, 216
molecular sieve, for sour gas production 180
monolayers in MoS_2, argon and krypton 195
oxygen selective, on sensitized chabazite 120
solvent recovery, theory and use 195
sulfur removal, liquid hydrocarbons 256
thermal regeneration of oxide-coated nickel, cobalt and copper 242
water, on various carbons 119

AIR CONDITIONING. See also Heat Pumps
central cooling system design, revised standards 282
cooling loads, residential, standard procedure 260
free piston compressor, power Robertshaw 4
free piston compressor, power generation aspects 15
gas-engine compressor, for cooling 235
industrial, component costs, estimation 64
industrial, design factors 64
Ionitron, for negative ion addition 39
LPG, domestic, commercial, pool and motel markets 134
preventive maintenance 235
promotion, progress and potential load-building 98
solar heat, in ammonia absorption system 282

AIR POLLUTION. See also Dust; individual contaminant compounds
acid formation, from SO_2 in fog 235
aerosol filtration, design and efficiency 283
auto exhaust, control methods, evaluation 64
auto exhaust, piloted catalytic afterburner 236
automobile design, hydrocarbon losses 135
catalytic combustion, exhaust hydrocarbons 211
chimneys, standards, height vs dispersion, Great Britain 261
contaminants, Los Angeles 64
control legislation, exhaust emission standards 261
dust prevention, Kaiser Steel, Fontana (Calif.) 16
dust removal, blast furnace gas 134
dusts, separation of sizes, in shear flow 261
engine exhaust, atmospheric purification by adsorption and oxidation 189
engine exhaust cleanup, catalytic oxidation 189
eye irritants 64
eye irritants, by photo-oxidation 261
fuel combustion, contaminant emission 49
flue gas scrubbing, large incinerators 135
from waste disposal practices 210
Hamilton, Ohio, survey and analysis 236
hydrocarbon, photo-oxidation in NO and exhaust gas mixtures 39
hydrocarbons, removal by catalytic oxidation 189
incinerator design and fuel moisture, effects 112
incinerator flue emissions, residential buildings 160
nitrogen oxides, reduction in flue gases 260
North Carolina, prevention programs 189
odor control, test methods 210
organic, prevention by combustion catalytic 64
photo-oxidation, exhaust control and standards 85
prevention, by dust control 210
prevention, electric precipitators 210
public utilities, from fuel combustion or handling 210
public utilities, general, electricity 210
publications R. A. Taft Center 222
reduction, by catalytic oxidation in oven design 160
research goals, national needs 283
review, and possible solutions 283
smoke density recorder, photoelectric 114
state laws, digest 4
sulfur dioxide removal, anion exchange resins 235
survey, Los Angeles area 261
survey, San Francisco Bay area 210
varnish fume incineration 283

AMMONIA
catalysts, for synthesis gas production 279
synthesis gas, by scrubbing with liquid N_2 156
synthetic, largest-volume petrochemical 206

ANALYTICAL INSTRUMENTS. See also Chromatography; Electron Microscopy; Emission Spectrograph; Spectra-Spectrometry
basic types and classification 139
developments in Canadian plants 241
electrochemical analyzers 139
for industrial air contaminants 166
pyrometer, Shaw to avoid emissivity error 41

APPLIANCES. See also Air Conditioning; Burners; Cookers; Dryers; Heaters; Incinerators; Pilot Lights; Refrigerators
and gas engineering, 1960 directory 4
exhibition, Cologne, Germany, 1960 122
permanent exhibit center, Dallas 246
sales, 1960 prediction 2
sales, potential market, 57.4 million 1960-64 122
sales program, Philadelphia 74
standards, testing and safety, Italy 283
testing standards, A.G.A. 122
ventilation, clothes dryers 40

AROMATICS. See also Hydrocarbons; Naphthalene
chromatography, analytical procedures 241
hydrorefining, for sulfur and unsaturates removal 256
mass spectrometric sensitivities 20
naphthalene extraction, by complexors 185
refining advances 231
refining, continuous pure-product still 231
side chains, by ozonolysis 194
synthetic naphthalene, three oil company plants 156

AUTOMATION. See also Compressor Stations; Pipeline Systems; Telemetering
application, related to personnel 181
centralized, for complete system 181
chromatographic analyzer, absorption and fractionation control 87
compression, drive control 254
compressor station system, Colorado (Springfield) 254
compressor station, with Wiggins holder 152
computer, closed-loop ammonia plant 263
computer control, cracking furnaces for ethylene 212
computer control, for process operation 212
computers, for variable load factor pipelines 127
control, internal, compressor stations 127
distribution system, cost comparison, new and old operation 63
economics and improved operation 238
electronic controls, pipelines 152
five remote stations, Columbia Gulf Transmission Co. 153
gas distribution, control 135
gas generating plants, Britain 114
gathering and dispatching, applications 152
growth factors necessary for justification 57
hydrocarbons chromatography, programmed temperature techniques 166
industrial growth factor 4
local, with remote supervision, Colorado Interstate 153
master station, gas turbine compressor 229
microwave, Columbia Gas project 79
microwave control, offshore compressors 105
natural gasoline industry, applications 105
pipeline, questionnaire evaluation 254
pipelines, components available 32
power level controller 153
remote control station, Texas Eastern 229
remote supervision, Colorado Interstate 153

B

BITUMINOUS SANDS
Alberta, review of exploration 224

BURNERS. See also Flame Research; Ignition; Pilot Lights
catalytic surface, for cooker tops 39
convergent multiple jets, for glass blowers 189
cooled-tip, for synthesis gas production 85
design, flow patterns and turbulence 261
double port, cone flame 161
flame retaining, cooled central port 135
furnace, domestic, conical spreading flame 39
high-performance company experience 112
infrared, applications and potential field, literature review 161
infrared, applications in processing 211
lid, for flame direction 135
multiport, design research 113
output control, waste gas inspirator 39
porous medium, stabilized position of combustion 161
ports, lint stoppages, minimization 112
pressure, high-velocity premixed 39
protected tip, for synthesis gas production 85
ribbon-flame pilot, sheet metal 135
small flame, sheet steel heads 161
surface, forced air, for cookers 283
wall, radiant cavity, with convective flame baffle 236

BUTADIENE. See also Hydrocarbons
methane feedstock, via acetylene and acetaldehyde 256
production methods, and importance 279
thermal conductivities, near critical point 289

BUTANE. See also Hydrocarbons; LPG
domestic use vs petrochemical 222

C

CALORIMETRY
adiabatic, automatic shield control 21

CARBON
and H_2 determination, unproved semimicro 91
-atomic H, O, CO, H_2O reactions 44
electrodes, pitch requirements 108
radioactive, gas counting in combustion 20

CARBON BLACK. See also Adsorption
combustion process, baffled tube reactor 81
oil process now dominant 256

CARBON DIOXIDE
absorption, in caustic solution 168
from natural gas combustion, for water treatment 211
in anhydrous ammonia 214
infrared flue gas analyzer 117
photolysis, ultraviolet technique 267
thermal properties, critical region 289
waste gases, cleaning processes, steel making 208

Removal
Fluor organic solvent, development 103
glycerol triacetate pressure scrubbing 78

hot carbonate process, economics 78
selective solvent, ether acetates of oxyalkyl ethylene glycols 104
selective solvent, propylene carbonate 104

CARBON MONOXIDE
conversion, city gas, water gas shift 206
gypsum reduction 59
thermoelectric detection, combustion 22

Removal
ammoniacal copper, regeneration control 104
from hydrogen catalysis 232

CARBONIZATION
retort works, White Lund, Britain 157
suspension, multistage procedure 59
traveling grate device 59, 232

CATALYSIS. See also Fischer-Tropsch; Hydrogenation
ammonia synthesis, chemisorption vs rate 94
hydrogenation, ethylene, variables 22
nitrogen chemisorption, in NH_3 synthesis 60

CATALYSTS
adsorption, hydrogen on platinum 60
chemisorption, oxygen on nickel 232
cracking, structure and properties 157
cracking, structure theory 81
hydrated and alpha aluminas, solid state reaction study 279
hydrogenation, kinetics, cyclopropane 256
hyrogenation, role of supports 168
nickel, carbon formation from CO 257
nickel, hydrogen chemisorption 257
nitrogen chemisorption, iron and cobalt oxides 157
oxygen adsorption, a K X-ray absorption edge 232
palladium and rhodium, supported, hydrogen chemisorption 108
poisoning, thiophene on platinum 256
Raney nickel, in hydrogen reactions 232
reforming, behavior of supported platinum 60

CATHODIC PROTECTION. See also Coatings; Corrosion; Piping; Plastics
anodes, high silicon cast iron, performance 42
anodes, metal, lead and platinized 20
casings at crossings, offsetting effects 286
casing, current requirements 19
corrosion control, Tapline 42
critical factors controlling protection 239
deep ground beds, advantages 116
detector, current short circuits, buried line 264
electrical grounding systems, effects 165
for glass lined water heaters 239
fundamentals, with and without coatings 213
ground beds, for low-resistance soils 89
installation, gas and water lines 239
insulation, for excessive current 89
insulation requirements, gas service 89
marine applications, tankers 116
metals, anodic passivation 42
pipelines, design 192
prestressed concrete pipe 165
sea structures, anode-zinc improves by added metals 213
survey, current requirements, German practice 264
system program, experience 68
tankers 68
Tapline, added station 68
thermoelectric, gas-fired generator 90
titanium-platinum anodes 90
water tanks, anode and current designs 213
weather (rain) effects 89

CHEMISORPTION. See also Adsorption
CO on metals, mechanism, by infrared 267
hydrocarbon radicals, on reduced nickel 22
gases on solids, kinetics, bibliography 141

CHIMNEYS. See also Air Pollution
standards, height vs dispersion, Great Britain 261

CHROMATOGRAPHY. See also Analytical Instruments
acoustic detector, for separated components 266
aromatics, using Carbowax as stationary phase 241
automation, analyzer absorption and fractional control 87
carbon and hydrogen, determination 43
carbon and hydrogen, determination by microcombustion 43
carbon and hydrogen, in O_2 carrier 287
carbon monoxide as carrier 241
column efficiency, calculation 92
column efficiency, temperature 92
column size, relation to sample size 241
crude components, separation 166
for natural gas analysis 215
gasoline recovery, application 21
gasolines, C_3 to C_5 compounds, method 194
high-boiling compounds 287
hydrocarbons, programmed temperature technique 166
impurities, selective removal 194
mass transfer, effect on efficiency 69
natural gas, Burrell Kromo-Tog (K-2) 215
of acrylic polymers by direct degrading 215
olefins, C_6, C_7 and C_8 structure 194
partitioning, for high volatile components 215
plate height equations 139
principles and applications, review 92
separation, molecular sieves 139
silica-alumina for hydrocarbons 215
technique, review, 1959-60 92
techniques, functional group analysis 241
temperature, programmed 139
variables, optimum conditions mathematical expressions 266
viscosity effects, thermal conductivity detectors 43

COAL. See also Gasification
carbon/hydrogen and polymeric structure 92
national fuels policy to assure balance 3
reflectivity, photoelectric method 257
reserves vs estimated industrial and domestic requirements to 1980, Scotland 272
structure, dispersed vitrines, X-ray scattering 130

Analysis
softening temperature, with additives 241
total sulfur, by catalytic combustion 241
X-ray study vs chemical and physical properties 215

Carbonization
devolatilization kinetics 30
devolatized steam, tubular zone, laminar flow 279
enclosed endless refractory conveyor with retort chamber 279
isotope-tagged model compounds 30
low-temperature char desulfurization 35
low-temperature Montana pilot plant 35
low-temperature new Wyoming and Utah plans 35

low-temperature, types and economics 206
retort plant, shutdown operations, England 82
volatiles, by mass spectrometer 31

Combustion
lean cupola gas, for heat recovery 39

Gasification
coal needs, Lurgi and Gaz Integrale processes 60
co-current fluidized-bed reactor 233
conversion, carbon to synthesis gas 61
derivatives, Wilson report (Great Britain), summary 206
Gaz Integrale process, new plants 12
kinetics, carbon with carbon dioxide 185
Lurgi, low-temperature, steam-oxygen sweep 61
Lurgi plant, improved operation, Germany 61
Lurgi pressure plant, Westfield, Britain 157
nitrogen safety purge in pressure generators 36
oxygen partial combustion, semi-quenched, to yield methane 185
oxygen, process variables, Bureau of Mines work 60
oxygen-steam, tangential suspension 36
pipeline gas, by Lurgi generators for char 1
pressure, Bureau of Mines pilot program 60
reactor, two-chamber, baffled 14
resonant tube generator 157
rotary, slag-bath-floated fuel bed 61
Rummel slag bath process 12
selection, for Lurgi and Gaz Integrale plants 36
slag-bath pilot plant, Britain 157
split control, air and steam 280
Sumitomo (Japan) process, description 206
total, and synthetics, British trend 257
underground, physico-chemical principles 185
water-gas units, Johannesburg, South Africa 185

Handling
pipeline transport, settling prevention 27
pressurized powders, performance 115

Hydrogenation
and acetylation, vs dielectric properties 131
entrained solids, laboratory apparatus 257
high Btu gas production, application 131
liquid phase, for heavy oil, process factors 258
mechanism and catalysts 185
pilot plant, Mo catalyst study 257
reactor, tubular, high-velocity 14

Lignite
distillation and gasification 233
sulfur, in raw and charred 207
underground gasification 185

Properties
and uses study, British miners conference 232
relation to coke and to coal plasticity 232

Research
Bureau Mines, 1958 summary 199
review and development, 1959 74

COAL CHEMICALS
motorfuels and chemicals 108
synthesis, via anthracite gasification 108

COATINGS. See also Cathodic Protection; Corrosion
abrasion resistance test 68
bacterial activity, backfilled pipeline ditches 90
coal tar, cold applied, testing 192
coal tar, tests, with non-bituminous primers 20
corrosion resistance, in fresh water 138
flame cleaning, gasholder for repainting 192
hot applied, main corrosion defense 165
in-place piping, and cleaning 138
inspector's duties 165
internal, pipe survey, experience and types 90
internal, troweling device 90
joint sealing, internal machine 90
lining mortar distributors, rotary head 63
metallic, high temperature 90
paint, laboratory test program 20
paint, performance on steel 214
paint program, organization 43
performance, ship interior 192
pipe, plant operation 68
plant, modern, applications 20
plasma arc 286
plastic, steel pipe, advantages 42
polyethylene, asphaltic-rubber-chlorinated, for extrusion 43
polyethylene, extruded and tape for pipe 239
polyethylene, extruded, for pipe 116
polymer materials, consumption 138
production line operations, new plant 165
properties and structure vs performance 165
surface primer, zinc silicate 240
tape, single thickness, coal tar 214
testing, for selection 90
well casing, tests of protection 240

COKE
from Illinois coal-petroleum blends 280
marketing difficulties, Britain 146
ovens, application at Rourkela (India) steel works 6

COMBUSTION. See also Burners; Flame Research; Ignition; Pilot Lights
butane oxidation, surface effects 113
catalyzed, by stabilizing thermal feedback 65
equilibrium composition waste gases 135
methane and ethane limits in chlorine 135
oxidant flames, in hydrocarbons 161
Pyrocore catalytic reactor 113
review, Seventh International Symposium papers 211

COMMUNICATIONS. See also Telemetering
facilities, design, costs and types 32
high frequency transmission problems 153
microwave, for Kansas-Nebraska N. G. Co. 204
pipeline control, automatic, equipment 79
radio, in oil and gas industry 79
radio maintenance, Central Electric and Gas Company 204
Tapline VHF system, point-to-point 277

COMPETITION
central heating, oil-to-gas conversion, market study 2
coal, national fuels policy to assure balance 3
coal, survival fight 51
coal slurry pipeline, $125-million project 249
electric heat, organized resistance 271
electric househeating, psychological sales 246
electricity, displacing LPG by default 246
electricity, heating, future trends 75
fueloil, air conditioning and heating unit 249
fueloil, depletion cut, effect on cost 26
fueloil, industrial use, increase (Britain) 2
gas heating, automatic, 1959 vs other fuels 74
gas shapes market conditions, assertions 197

gas vs oil, influence on market 124
LPG, advantages over oil 51
national fuels policy 224
oil, gas, and coal, ten year forecast 2
oil to lose customers to gas 51
petroleum, crisis in sales imminent 271
petroleum oil heat conversion campaign (Levittown, N. J.) 271
petroleum marketers, promotional campaign 176
promotion, program 197
sales, automatic heating, 1959 26

COMPRESSIBILITY
correlations, proposed third parameter 217
correction factor, for PVT correlation 168
helium-nitrogen, to 4000 psia 45
in calculating standard of heating value 242

emission analysis, effect of chemical state 118
techniques, biennial literature review, 1959 118

Services Available to GAS ABSTRACTS Readers

Photocopies

Photocopies of all articles abstracted in *Gas Abstracts*, except those enumerated here, are available from the Institute at cost:*

1) Russian Articles.—Abstracts are obtained from services specializing in this field. English translations can be supplied by arrangement with the appropriate abstractor.
2) U.S. Patents.—Printed copies can be secured at 25 cents each (remittance with order) from the Commissioner of Patents, Washington 25, D.C.
3) Books, Special Reports.—When a price is given in the abstract, these should be secured from a bookdealer or the publisher; when stated *free*, from the publisher.

Types of Photocopies

Depending on the "tightness" of the binding (which determines whether pages can be laid flat without breaking the binding), and the color of the paper and ink used in the original being copied, photocopies may take any of several forms:

1. Positive paper prints made by the reflex process.
2. Positive paper prints enlarged by xerography from microfilm negatives.
3. Negative photostats.
4. Positive photostats.

Choice of the method used must necessarily rest with the Institute. All photocopies are approximately the same size as the original material.

Cost of Service

The photocopy service charge is:

First 5 pages or fraction thereof of one article in one issue $1.50

Each subsequent 4 pages or fraction thereof of the above one article in the same issue.....$1.00

Invoices are rendered to the Institute's Members and Contributors only; payment in advance is required of others.

The Institute may, at its option, fill orders from non-Members and non-Contributors without payment in advance, but an additional charge of $1.00 to cover billing costs will be made on each such order.

Microfilm

Microfilm copies of articles abstracted in *Gas Abstracts* are likewise available at cost.* The material is photographed on 35 mm unperforated negative film at 5¢ per page, with a minimum of 50 pages, $2.50, per order. Invoices are rendered to the Institute's Members and Contributors only; payment in advance is required of others.

The Institute may, at its option, fill orders from non-Members and non-Contributors without payment in advance, but an additional charge of $1.00 to cover billing costs will be made on each such order.

Bibliographies and Literature Searches

The library will prepare bibliographies and make literature searches on a cost basis plus a service charge. A comprehensive statement detailing the problem must be presented with the request.

Gas Abstracts on Cards

The abstracts in each monthly issue are also printed individually on 5 x 8-inch cards. Each card bears at its top the author and subject headings under which it may be filed. As many copies of each card are supplied as there are headings on that card, enabling filing of the abstract under all of its headings, eliminating cross-indexing.

The annual subscription to *Gas Abstracts on Cards*, a mailing of 500-1000 cards each month, is $120.00 to U. S. addresses, $150.00 foreign.

Since the printing order for cards is based on the current number of subscribers, a subscription for this service commences with the month in which the order is received. Back numbers of *Gas Abstracts on Cards* are not available.

Back Numbers of Gas Abstracts

In response to an increasing number of requests from utilities, colleges, and technical libraries which have only recently learned of the reference value of *Gas Abstracts*, the Institute has taken steps to make available single numbers, volumes, or complete files of this publication to date, starting with Vols. 1 (1945) and 2 (1946), some numbers of which are out of print.

The latter numbers are reproduced by a photoprinting process from copies in the Institute's libraries, and Vols. 1 and 2 can now be purchased at $35 per volume, unbound; single monthly numbers are offered at $3 each.

Vols. 3 to date are available at current subscription prices, $18 per volume to U. S. addresses, $22 foreign. Monthly numbers are $2 each.

---

*In requesting and accepting photocopies or microfilm copies, the applicant agrees to the following:

1. The applicant desires this duplication solely for use in lieu of loan or manual transcription. Responsibility for questions of copyright that might arise in this copying, and in the use of the copies, is assumed by the applicant.

2. The applicant understands that the Institute does not sell the photocopies, but merely performs the service of copying at the applicant's request; the fee paid is exclusively for such service and is established on the basis of no profit to the Institute.

3. The Institute reserves the right at its own discretion to decline to make photocopies requested, or to limit the number of copies, within the principle of fair use of copyrighted material.
